The 112 second paragraph rejection is hereby withdrawn.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Persi in view of Viviano et al for the same reason set forth in the previous office action.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Persi for the same reason set forth in the previous office action.

In the response filed 3/2/05, applicant argues in both the disclosures of Persi and Viviano et al, the edges of the paste are sealed intimately to form a pocket and this is quite different from the present invention in which the top and bottom borders are clearly distant to one another and sealed by the application of a cordon. This argument is not persuasive. The claims recite "substantially with juxtaposition of the top and bottom borders". Juxtapose, as defined in the Webster's dictionary, means to place side by side; thus, the borders are next to each other and this is what is disclosed in Persi and Viviano et al. There is no clear distance between the borders recited in the claims; thus, applicant argues a limitation that is not present in the claims. As to the cordon, Viviano et al teach an alternative sealing method using a starch. Starch is also well known in the art to be used as adhesive. It would have been obvious to one skilled in the art to use a known alternative to achieve the same objective.

With respect to claims 8-10, applicant makes the same argument as above which is not persuasive for the reason set forth above.

Applicant's arguments filed 3/2/05 have been fully considered but they are not persuasive.
